Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U. S. Patent Application Publication No. US 2002/0027031 A1 to Miyata (hereinafter referred to as Miyata).

Claim 1:

Miyata (Figs. 1-8; paragraphs [0006] to [0075]) discloses a vehicle comprising:

- A continuous stepless transmission (i.e., Fig. 3, element T);

- A controlling section (i.e., Fig. 2, element 56) for performing speed-changing operation of the continuous stepless transmission;
- A speed change operation section (i.e., Fig. 5, elements 61 and 62) adapted to switch a speed change ratio of the continuous stepless transmission;
- A shift-mode-switching section (i.e., Fig. 5, element 60) which switches a mode of a speed change ratios switching between a first mode for switching the speed ratio in stages among a plurality of preset speed change ratios (i.e., Fig. 5, elements 55b-g and paragraph [0067] being the six present variable speed ratios) and a second mode for switching the speed change ratio continuously (i.e., Fig. 5 element 55a and paragraph [0068] being the full-automatic mode);
- Wherein the control section that performs a speed changing operation of the continuous stepless transmission at least based on a speed change operation signal indicating an operating state of the speed change operation section and a mode signal indicating the mode in which the shift-mode-switching section is operating (i.e., paragraphs [0054] to [0069]).

Allowable Subject Matter

5. Claims 5-9 are allowed.

Response to Arguments

6. Applicants' arguments filed on 18 June 2009 have been fully considered but they are not persuasive.

Applicants argue that Miyata reference does not disclose wherein the speed change ratio may be changed by a plurality of stages in a single operation. Examiner respectfully disagrees because the present claim 1 does not reflect this particular argument.

Accordingly, as set forth above, Miyata reference meets the claimed limitations.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
